# MyScholarShop | Improved Navigation for Search Results in MyScholarShop
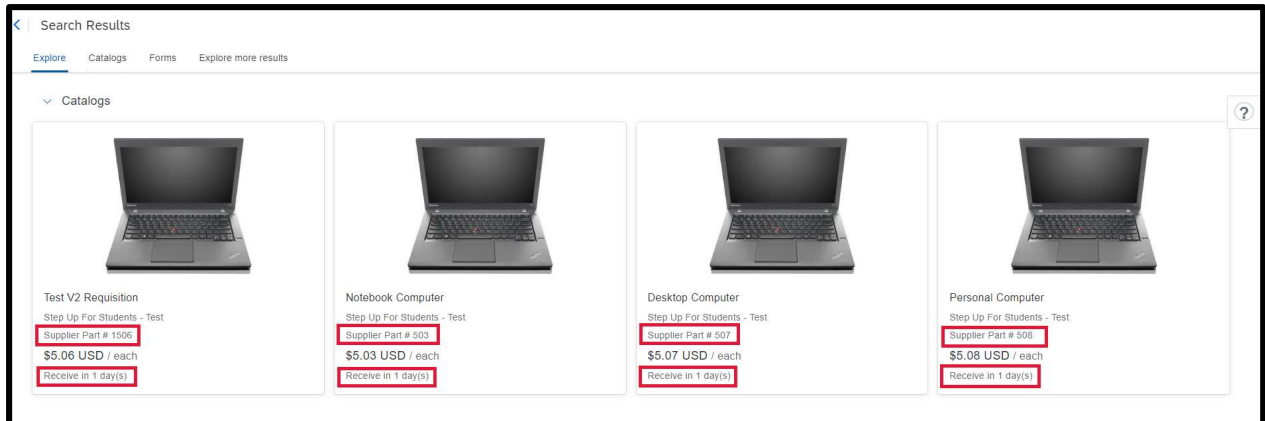

The search functionality within MyScholarShop has been updated to include the following newly enhanced features.

Browsing Search Results

1. When you search for an item, your search results will display on a tabbed layout, defaulting on the **Explore** tab. Each section on this tab features a limited number of items, select **View all in catalogs (###)** or select the **Catalogs** tab to view more items.

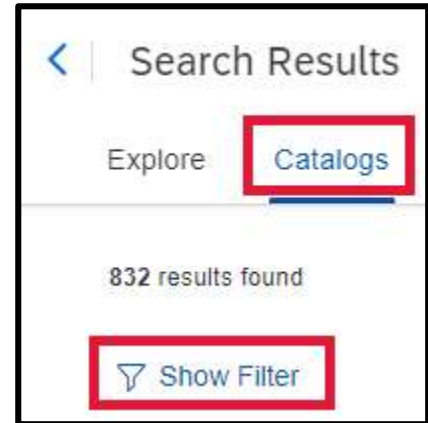

2. Search results now contain more information about the items. For example, if provided by the supplier, you can view the item's expected shipment time as well as the supplier part number.
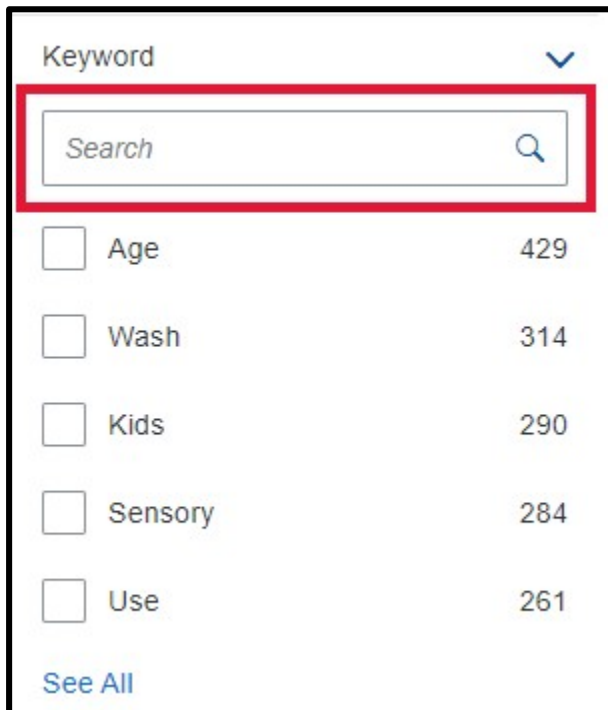

Filtering Search Results

1. Filters can be found by clicking on the **Catalogs** tab. Filters can be hidden by clicking the **Hide Filter** button and displayed by clicking the **Show Filter** button.

2. The **Keyword** filter now has a **Search** bar to be used to eliminate excessive scrolling.

Comparing Search Results

1. Clicking the **Compare** checkbox on 2 to 4 items allows comparison of Price, Availability, Supplier, and more.
